

Natural Resources and Basic Needs

The Tyler family chose Blackacre as a good sight for a farm because of the natural resources.

What natural resources did they use to make the buildings?

What natural resources helped Blackacre to be a good place to grow food and raise animals?

The wildlife at Blackacre also must have the basic needs in order to survive. The needs for wildlife do not include clothing, but they must have water, food, and shelter.

As you walk through the woods, fields, and near the ponds, think about how these animals use natural resources to provide for their basic needs.

Animal	Shelter	Food	Water
Squirrel			
Frog			
Wyandotte Ants			
Birds
