Front Office Sick Room

Shelter-In-Place Severe Weather

Emergency Procedures:

1. When you hear the severe weather signal/siren proceed at once to your designated area of the building
2. Have students assume appropriate shelter positions.
3. Doors in shelter area should be closed
4. Swing area of doors should not be used for sheltering
5. Secure glass doors open to prevent glass from becoming missiles
6. Maintain sheltered position until the ALL-CLEAR is given

Shelter

Primary Shelter: Hallways, clear from doors

Secondary Shelter: Classrooms under desk away from windows and doors

Take additional protective action, such as getting under a desk or heavy furniture

Earthquake

1. Duck, cover and hold
2. Utilize desks and tables for shelter.
3. Remain in sheltered position for at least 60 seconds after shaking ceases.
4. Listen for instructions, be prepared to evacuate if instructed.

External Chemical Leak

1. Initiate shelter in place plan
2. Shut all windows and doors.
3. Disable heating, ventilation, and air conditioning units
4. Turn on the radio and television for additional information.
5. Do not proceed outside unless directed.
